RequityAI

Grant RequityAI Access to Your Business Portfolio

You already have a Facebook Business Portfolio - this takes about 5 minutes

! Granting RequityAI partner access does NOT transfer ownership of your account. You remain the full owner at all times. We are simply a manager on your account.

WHAT YOU WILL NEED

Before you start, have the RequityAI Business ID ready. You will enter this twice during the process.

RequityAI Business ID

1689268498270088

Card IMPORTANT - Verify your payment card before your setup call. Many banks block Facebook charges on new cards. Go to Ads Manager, open billing, add your card, and complete the verification step. Facebook may charge a small temporary amount under $1 which is refunded automatically. If this is not done, your campaigns cannot go live.

STEP-BY-STEP INSTRUCTIONS

1 **Go to business.facebook.com and log in**

Make sure you are logged into the Facebook account that owns your Business Portfolio. If you have multiple accounts, select the correct one.

2 **Click the gear icon to open Business Settings**

3 **Click Partners under Users, then click Add**

4 **Select Give a partner access to your assets**

Important: do NOT select Ask a partner to share their assets. That is the wrong option.

5 **Enter the RequityAI Business ID and click Next**

Copy the ID exactly from the box above.

6 **Select your Facebook Page and enable Admin access**

Admin access is required so RequityAI can fully manage your page without needing to request additional permissions each time.

7 **Go to Settings, click Ad Accounts under Accounts, then click Assign Partner**

8 **Enter the RequityAI Business ID again, toggle on Full control, and click Assign**

Full control is required. Partial access causes delays and means RequityAI cannot manage campaigns independently.

9 **Verify your payment card in Ads Manager**

See the important note above about card verification. This must be done before your campaigns can go live.

10 **Message your RequityAI contact to confirm all steps are complete**

Our team will verify access and begin your campaign setup within 24 hours.

Done That is it. Message your RequityAI contact to confirm all steps are complete. Our team will verify access and begin your campaign setup within 24 hours.

COMMON QUESTIONS

Question	Answer
Will RequityAI be able to spend money from my account?	Yes. Campaigns run on your ad account and your payment method. This is standard practice for all Facebook advertising agencies.
Why does RequityAI need Admin access?	Admin access means our team can manage everything without coming back to you for permissions every time something needs to be changed. Partial access creates delays and bottlenecks.
My card was declined when Facebook tried to charge it.	This is common. Many banks block Facebook charges on cards that have not been specifically authorised for Facebook payments. Call your bank, tell them you are authorising Facebook ad charges, then retry.
Can I remove access at any time?	Yes. Go to Business Settings, click Partners, find RequityAI, and

	click Remove.
I cannot find my ad account in the list.	Your ad account may not be linked to your Business Portfolio yet. Message RequityAI and we will guide you through adding it.
I have multiple Business Portfolios. Which one do I use?	Use the one that contains the Facebook Page and Ad Account you want RequityAI to run ads from.

NEED HELP?

If you get stuck at any step, do not guess. Message your RequityAI contact directly. We complete this setup every week and can resolve any issue quickly.
